ABOUT THE TRAINER

Prajwal is a cybersecurity analyst and trainer with hands-on experience in penetration testing, threat intelligence automation, and AI-powered security tooling. He has delivered a 15-day offline Ethical Hacking workshop, worked as a Junior Security Analyst conducting real client assessments, and built end-to-end security automation projects. His training style is lab-driven: students build, attack, and defend real environments rather than only reading slides.

SESSION TOPICS

- **Basics of Ethical Hacking:** Recon, Google Dorking, OWASP Top 10, and core networking fundamentals (OSI, TCP/IP, routing)
- **Hands-on Offensive Tooling:** Practical use of Burp Suite, Nmap, OWASP ZAP and Nuclei on vulnerable lab machines and live-target VAPT exercises; Active Directory attacks from initial access to privilege escalation
- **Hands-on Defensive Tooling:** Log analysis with Splunk Enterprise and Universal Forwarder, forensics with Autopsy, and vulnerability scanning with Nessus
- **Major Frameworks:** Cyber Kill Chain, MITRE ATT&CK and OWASP Top 10
- **Report Writing:** Documenting findings and remediation recommendations in professional VAPT and vulnerability disclosure reports
- **CTF Practice:** Tool-based offensive and defensive sessions on HackingHub CTFs, tailored to student interest

TOOLS & TECHNOLOGIES

Burp Suite, OWASP ZAP, Nmap, Nuclei, Wireshark, Shodan, VirusTotal, Splunk, Autopsy, Nessus, Kali Linux, HackingHub, n8n, Docker, Kafka, Python, Rust, JavaScript, React, Next.js, Node.js, Flask, FastAPI, MongoDB, Supabase, AWS, Git, CI/CD

TRAINING EXPERIENCE

Ethical Hacking Trainer, 15-Day Offline Workshop

Agamya Cyber Tech, at SSIT Tumakuru, Karnataka | Aug 11 – 26, 2026

- Delivered a hands-on Basics of Ethical Hacking workshop where students built and broke easy-to-medium vulnerable lab machines.
- Set up personal Active Directory labs (Windows 10 target, Kali attacker, Domain Controller) and taught AD attacks from initial access to privilege escalation.
- Trained the defensive track on Splunk, Autopsy, and Nessus.
- Ran live-target VAPT exercises with report writing, plus sessions on recon, Google Dorking, OWASP Top 10, and networking fundamentals.
- Delivered tool-based offensive and defensive sessions tailored to student interest using HackingHub CTFs, and covered the Cyber Kill Chain and MITRE ATT&CK.

INDUSTRY EXPERIENCE

Junior Security Analyst
Agamya Cyber Tech, Bangalore | Present

- Conducted web application vulnerability assessments and bug hunting across multiple client targets, helping remediate critical flaws.
- Built and deployed a custom ML-integrated phishing detection tool that automated threat simulation and reduced manual analysis time.
- Authored vulnerability disclosure reports with remediation recommendations, following responsible-disclosure practices.

Cybersecurity and Penetration Testing Intern
Hacktify, Bangalore | Feb 2025 – Mar 2025

- Executed structured ethical-hacking exercises covering the OWASP Top 10 and pen-testing methodologies.
- Performed network traffic analysis and exploitation using Wireshark and Burp Suite; achieved top evaluation scores.

NOTABLE PROJECTS

- **AutoHawk (Threat Intelligence Orchestrator):** Automated pipeline that scanned 500+ endpoints, flagged 30 high-risk domains, and sent real-time Discord/Slack alerts, cutting manual threat-intel effort by 80%.
- **AegisSOC (AI-Powered SOC):** Full-stack SOC platform with real-time Wazuh alert ingestion, automated IOC extraction, and multi-source enrichment (VirusTotal, AbuseIPDB, AlienVault OTX).
- **Orchestr_AI (Secure CI/CD Orchestrator):** Event-driven pipeline with CodeT5-based vulnerability detection and Kafka-based microservices.
- **Jev Companion:** Rust-based decision layer that evaluates and gates AI coding-agent actions based on repository context and engineering risk.

ACHIEVEMENTS

- GenCys CTF 2026: 12th place (national finals)
- CyberHX CTF 2026: 20th place (finals)
- National-level participant, Smart India Hackathon and Intel AI Hackathon
- Co-authored a research paper on DNA-based data storage technology

EDUCATION

B.Tech CSE (Cybersecurity), Garden City University | 2022 – 2026 | CGPA: 9.06

LANGUAGES

English, Hindi, Kannada, Gujarati, Odia
